

## Kaleidoscope

When printing the templates, ensure that paper size is set to A4, and scale to 100%

September

This was published by the Ladies Art Company in 1898 as *Kaleidoscope*. It has also appeared under other names such as *Octagons*, *Willow the Wisp* and *Parquetry*.

It is easy to construct and the best effects are obtained by alternating light and dark fabrics for the triangles.

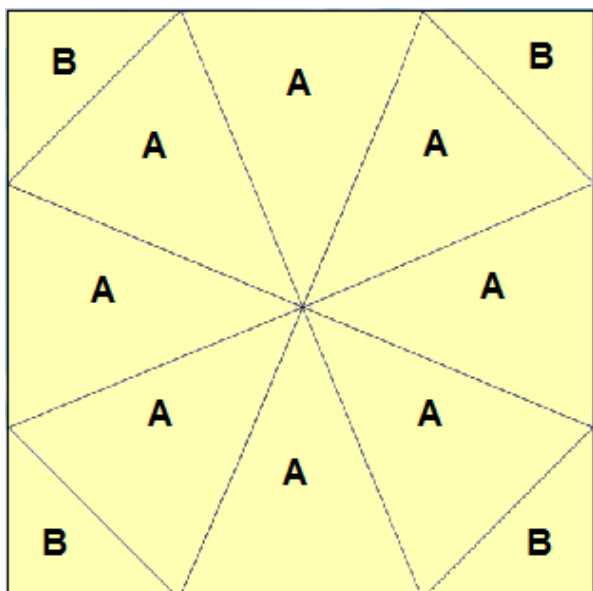

### Cutting Instructions

Fabric 1 - Black  
Fabric 2 - Green  
Fabric 3 - Orange

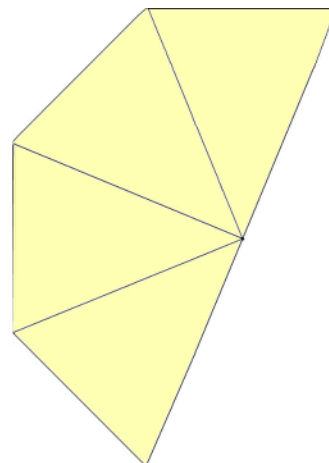

Cut out the two templates.  
Fabric 1 - Cut 4 of Template A.  
Fabric 2 - Cut 4 of Template A.  
Fabric 3 - Cut 4 of Template B.

### Assembly Instructions

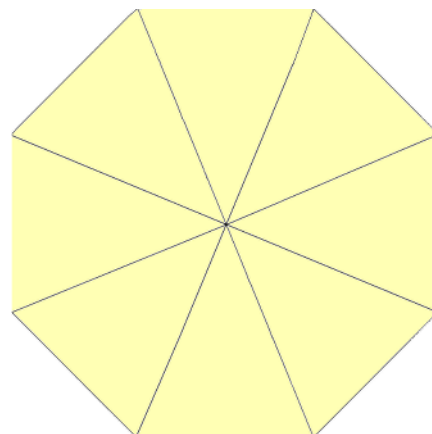

Consult this diagram to help with assembly.

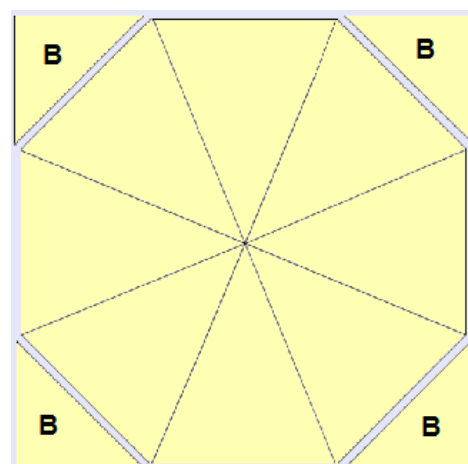

1. Take one of Template A in Fabric 1 and join it to one of Template A in Fabric 2. (called section 1.) Do this 4 times.
2. Take two of section 1 and join together. Do this twice. Make sure that you get the points of the triangles to line up properly.

3. You now have two parts of an octagon. Join them together, again lining up the points to meet in the middle.

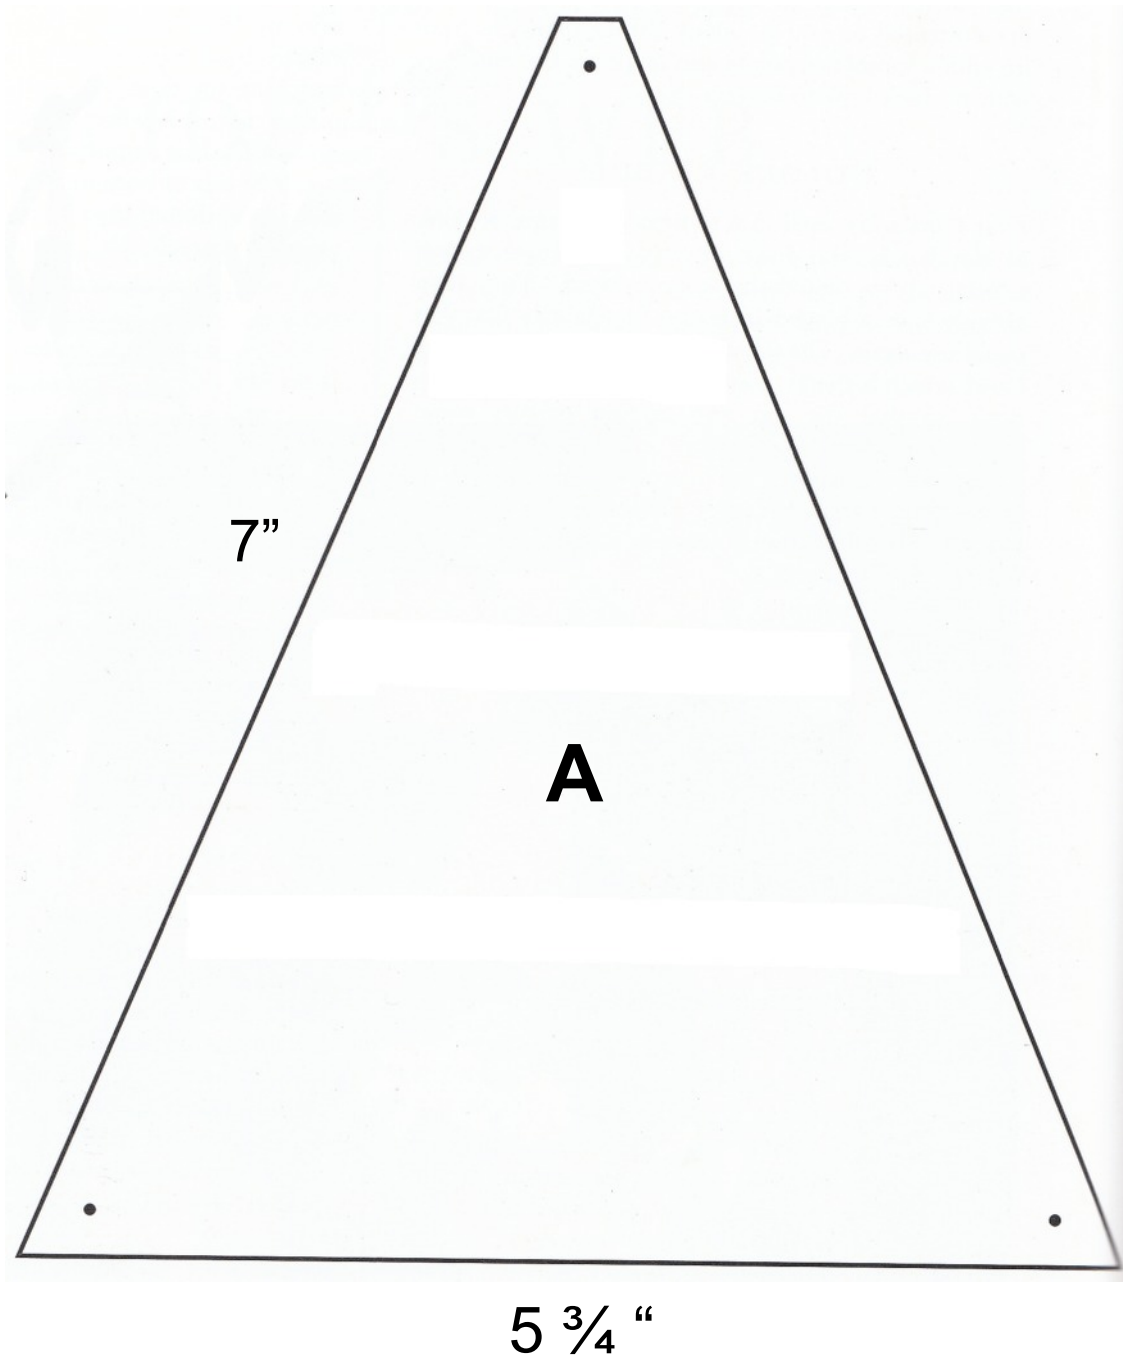

4. Now we must add the 4 triangles of Template B. Position them as shown and join. Make sure you join to the correct pieces.

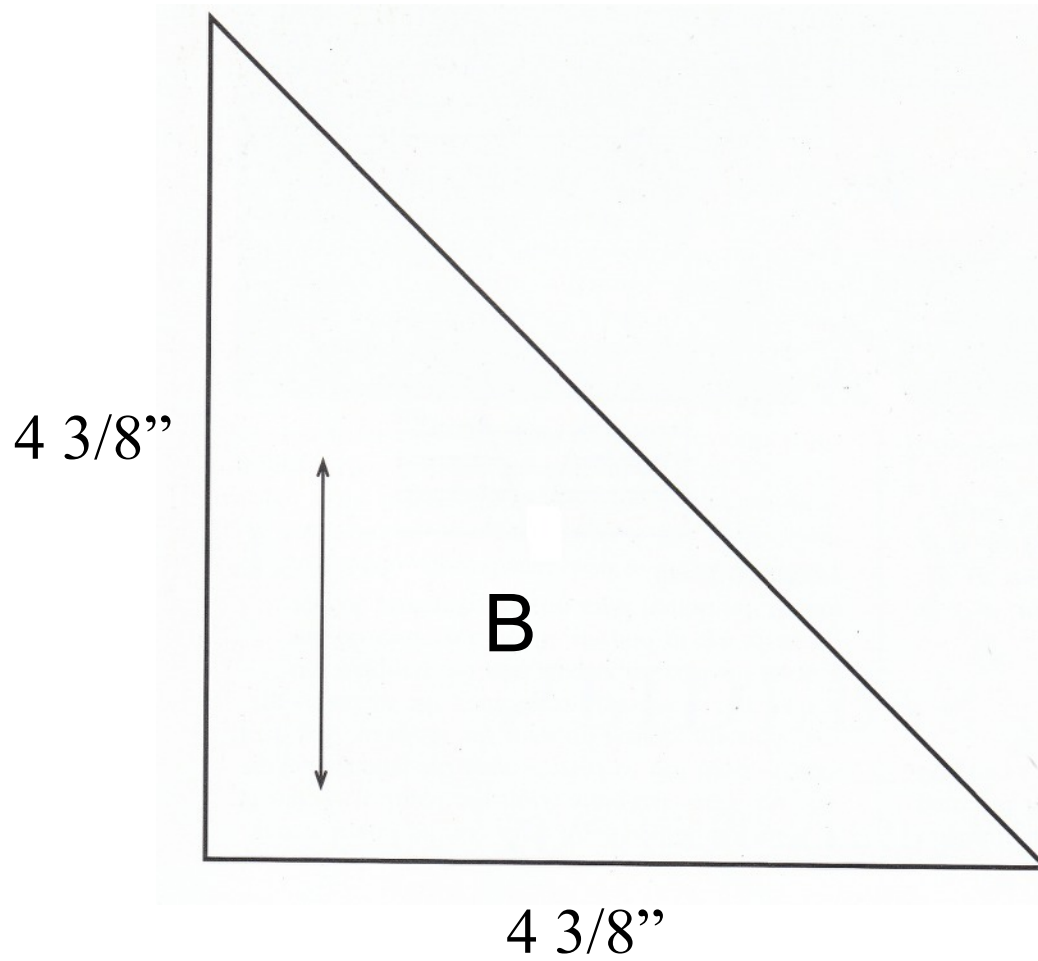

You should now have a 12½ inch square.

This template should be printed at 100% scale,  
with paper size set to A4
